We claim:

1. Compositions comprising:

one or more cationic polysaccharides in solution in an amount effective for solution preservation.

2. Compositions comprising:

one or more cationic polysaccharides in an amount effective as a preserving agent.

- The compositions of claim 1 or 2 wherein said one or more cationic polysaccharides are selected from the group consisting of variations of polyquaternium-10.
- The compositions of claim 1 or 2 wherein said one or more cationic polysaccharides are selected from the group consisting of Polymer JR 125, Polymer JR 400, Polymer JR 30M, Polymer LR 400, Polymer LR 30 M and Polymer LK.

- A method of producing compositions of claim 1 or 2 comprising:
   combining one or more cationic polysaccharides in an amount effective for solution preservation.
- 6. The method of claim 5 wherein said one or more cationic polysaccharides are selected from the group consisting of variations of polyquaternium-10.
- 7. The method of claim 5 wherein said one or more cationic polysaccharides are selected from the group consisting of Polymer JR 125, Polymer JR 400, Polymer JR 30M, Polymer LR 400, Polymer LR 30 M and Polymer LK.
- 8. A solution comprising one or more compositions of claim 1 or 2.
- The solution of claim 8 wherein said solution includes one or more buffers or buffering systems.
- The solution of claim 8 wherein said solution includes one or more tonicity agents.

- 11. The solution of claim 8 wherein said solution includes one or more surfactants.
- 12. The solution of claim 8 wherein said solution includes one or more viscosity agents.
- 13. A method of using the solution of claim 8 comprising: contacting a surface of a contact lens with said solution for a period of time suitable to eliminate a microbial burden on said contact lens.
- 14. A method of using the solution of claim 8 comprising:
  contacting a surface of a medical device with said solution for a period of time suitable to eliminate a microbial burden on said medical device.
- 15. A method of producing the solution of claim 8 comprising: adding an effective amount of one or more cationic polysaccharides to a solution.
